DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Japan 63-115333.

Japan 63-115333 teaches a disposable brush formed of paper (pulp molding) shown in Fig.5 which comprises a base 1 and a number of projections 2 formed on one side of the base by allowing portions of the base to project. As for claim 5 reciting a pulp molding method, methods of making are not germane to patentability in apparatus claims. This device can be disposed of, if desired.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japan 63-115333.

With respect to claims 2, 3 and 4 reciting specific limitations as to maximum compression load, height and curvature radius of the projections, optimum selection of

these parameters would fall within the level of ordinary skill in the art for the purpose of maximizing cleansing or massaging effect on the skin or body of a user.

5. Claims 1 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Currie '854.

Currie '854 teaches all of the claimed limitations of claims 1 and 9 as shown in Fig.5. Layer 14 is non-woven fabric or can include pulp molding therein (see col.9, lines 39-44). Layer 14 also has projections projecting therefrom and layer 54 is absorbent (see col.12, line 23) and is provided on the reverse side of the base. Currie's device could be disposed of.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Englebert, Lewis, Jr., Lennon, and Guthrie are pertinent to cleaning devices including projection arrangements.

Allowable Subject Matter

7. Claims 6-8 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
